

Smoke Advisory for Particulates for Antelope Valley.

Due to smoke from the wildfire, it is possible that areas of the Antelope Valley will encounter smoke at some time. Air Quality in areas affected by the smoke are considered to be unhealthful. If ash is in the air, or if you smell smoke, be cautious and use “common sense” to protect your family’s health. Everyone, especially people with heart or lung disease, (including asthma), older adults and children should limit time spent outdoors, and limit prolonged or heavy exertion. If you have symptoms of lung or heart disease that may be related to excess smoke exposure, including repeated coughing, shortness of breath or difficulty breathing, wheezing, chest tightness or pain, palpitations, nausea or unusual fatigue or lightheadedness, contact your health care provider.

This advisory will be updated Thursday, September 21st, by 4:30 p.m.

If you have questions, please contact the Antelope Valley Air Quality Management District at (661) 723-8070.
